ASTARTE - PEARL - TANDEM

JOINT SUMMER SCHOOL

3-7 June 2016

Technical University of Crete
Chania, Greece

Coastlines are more and more vulnerable to extreme events because of growing population, climate change, rapid urbanization and economic interests. From June 3 until June 7, 2016, young professionals are invited to come to Greece to discuss the most relevant topics on extreme coastal hazards with internationally renowned scientists in the ASTARTE – PEARL – TANDEM Joint Summer School.
