

TUC VPN SERVICE

Installation instructions for new versions of MAC OS

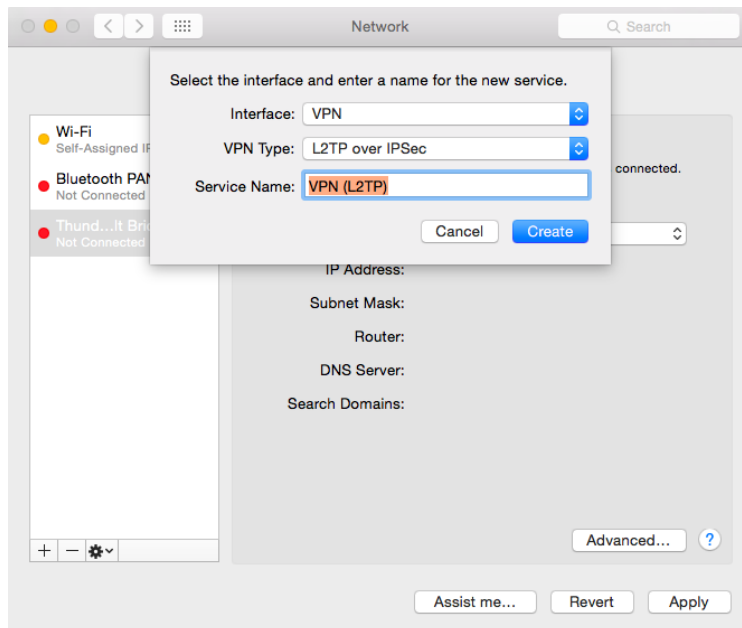

Please perform the following tasks:

- Go to *System Preferences*, open *Network*.

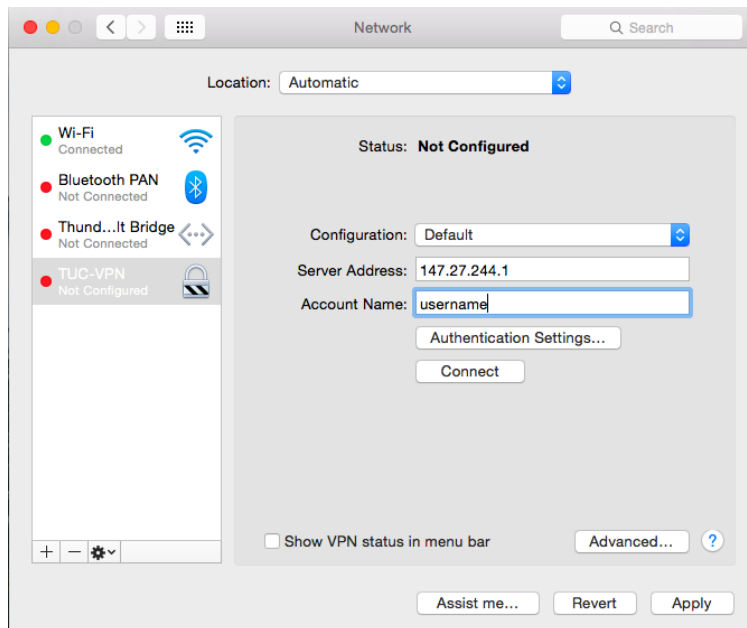

Click on + and select VPN

- The VPN Type will be **L2TP over IPSec**. Please change the service name to **TUC-VPN** for future reference.

- Type **147.27.244.1** in Server Address. Type your <username> in Account Name.

Select *Authentication Settings*.

- Type your password in Password field, type **TUC_KEY** in *Shared Secret* field and type **TUC_GROUP** in Group Name field (optional). Click *OK*, click *Apply* and the VPN connection is ready for use.
