

Install VPN Client

The appropriate VPN client must be installed on your device in order to connect to the VPN server of the **Technical University of Crete**.

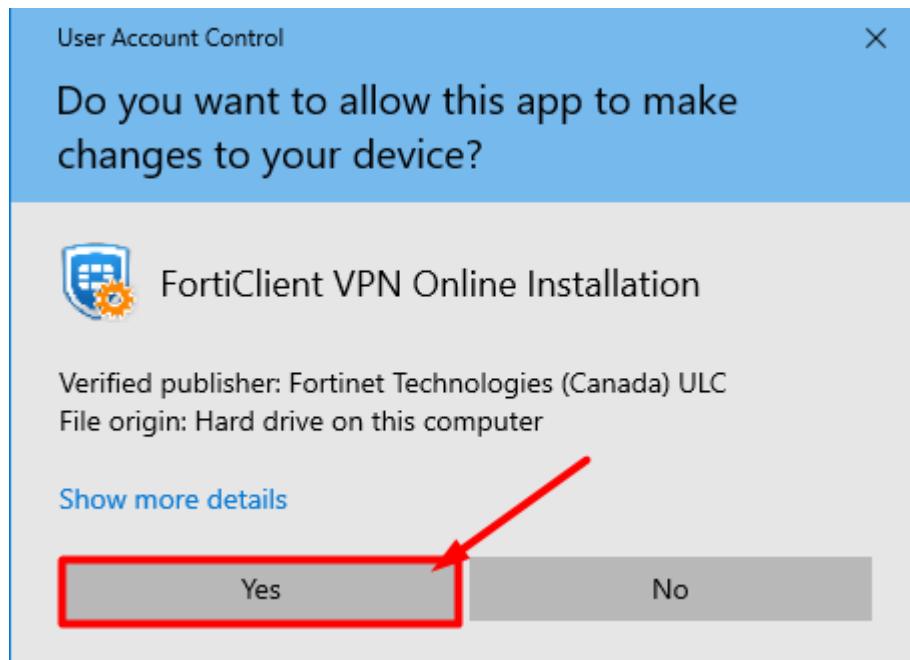

You can find the program for each operating system [here](#)(exe for Windows, dmg for Mac, and deb, rpm for Linux).

As for Android and iOS devices, you can download the application from the [Playstore](#) and the [Appstore](#) respectively.

You will receive the **FortiClientVPN** file, which you need to run by double-clicking on it.

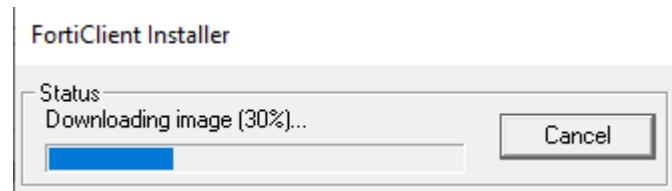

Note: In case you encounter any issues during installation, try the older version **FortiClientVPNOlineInstaller2023**

Windows

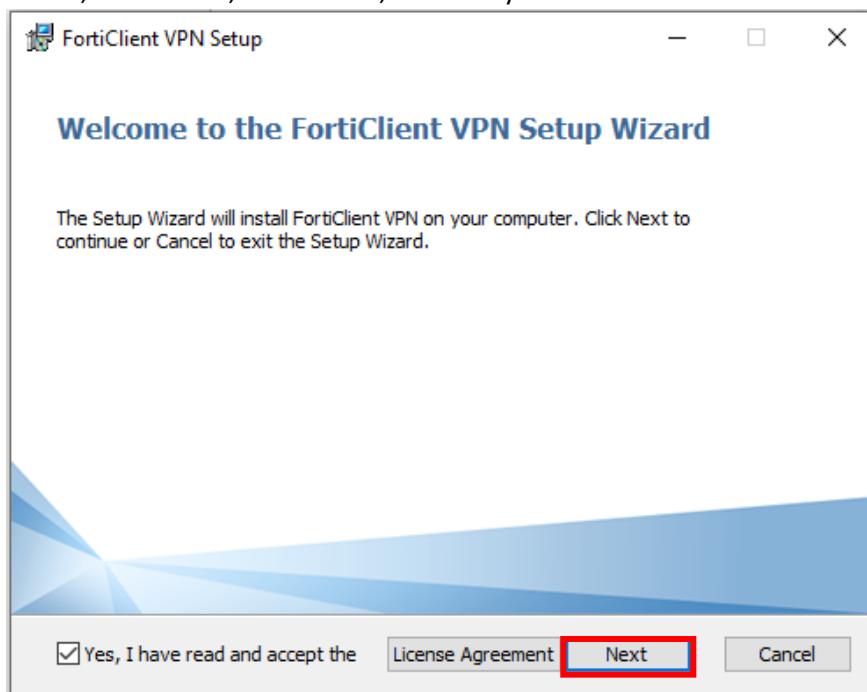

When prompted by **User Account Control**, select **Yes**.

The program download may take a few minutes, depending on your network connection speed.

Once the process is complete, the following window will appear. Click on "Yes, I have read and accept the"

In the next window, select **Next**, then **Install**, and finally **Finish**.

MAC OS, Android, etc.

Follow the installation instructions for your operating system, using the default options and granting the required permissions where necessary.

Setup VPN Client

Windows – Mac OS

The FortiClient VPN program is now installed in your device.

Locate it and execute it. Accept the unsupported usage license and click on [Configure VPN](#).

Fill in the following parameters:

- **Connection Name:** TUC VPN
- **Remote Gateway:** vpn.tuc.gr
- **Customize Port:** 6443

Edit VPN Connection

VPN	SSL-VPN	IPsec VPN	XML
Connection Name	TUC-VPN		
Description			
Remote Gateway	vpn.tuc.gr ✖		
	+Add Remote Gateway		
	<input checked="" type="checkbox"/> Customize port <input type="text" value="6443"/>		
	<input type="checkbox"/> Enable Single Sign On (SSO) for VPN Tunnel		
Client Certificate	<input type="button" value="None"/>		
Authentication	<input checked="" type="radio"/> Prompt on login <input type="radio"/> Save login		
	<input type="checkbox"/> Enable Dual-stack IPv4/IPv6 address		

Cancel **Save** Save

Select **Save**

Android

Android device users should accordingly configure the following settings in the client application:

- VPN Name: TUC VPN
- VPN Type: SSL VPN
- Port: 6443
- Servers: Add -> vpn.tuc.gr

Connect to VPN

Run **FortiClient VPN**, enter your credentials (**username only, not email**), and select **Connect**.
